Assignment Week #: Week 4

Humans and the Environment Quiz

1. What was your biggest take away from the Ocean Acidification article? The Coronavirus article?

2. From this weeks assignments, describe a cause and effect (feedback loop) that humans have had on the environment.

3. What are you currently doing that would have a positive effect on the environment?

4. What are you going to do in the future to have a positive effect on the environment?

Please answer the following questions about this week:

- 1) How long did you spend working only on Earth Science this week? Be honest.

- 2) What is something new you learned in Earth Science class this week?

- 3) Was there anything difficult about it? Explain.

- 4) How is Earth Science class this week related to something outside of Earth Science class? Another class or an experience from your life?

- 5) What is a question you have based on Earth Science class this week? Something you are curious about or wonder about, not something you were supposed to learn/do but didn't.

- 6) How are you doing this week?
