

AP STATS SUMMER ASSIGNMENT INFORMATION

1. All AP Stats assignment and resources will be on Khan Academy. Please click on this link:

<https://www.khanacademy.org/join/HRVKW29T> to access everything.

If the link above does not work, go to <https://www.khanacademy.org> and type in the teacher code: HRVKW29T

2. I highly recommend that you use your student log in information when creating an account on Khan Academy:

USERNAME: studentID@student.tusd.net

PASSWORD: (date of birth) mmddyyyy

Doing so will avoid any future issues.

3. Your assignments will automatically activate on June 2, 2021. You have all summer to do this. If you have to turn in your school laptop in July and don't have access to any other electronic device, please make sure that you finish your work before that date.
4. I will be monitoring your progress throughout the summer.

NOTE: It is important for you to finish your summer assignment to ensure your success in AP Stats for the school year 2021-22. Throughout the school year, I will make references to these concepts and I will assume that you have mastered them. There will be checkpoints (quizzes and unit tests) on the summer assignment. This will not affect your AP Stats grade for the incoming school year, but it will let you and me know if you're serious about taking the course. These quizzes and tests can be retaken, so there is no worry of failing them.

The summer assignment is designed to be done throughout the summer. You cannot just spend one day on it sometime before the first day of school. If you do so, you will NOT FINISH the assignment. Please plan accordingly.

Since this is an Advance Placement class, this means that you will have an AP Stats test in the spring of 2022. Doing the summer assignment will give us more time to discuss the key concepts in-depth so you will be prepared to take the test.
