

Week 5: Online Learning

Video Production

Mrs. Burkert

Period: 4

WEEK 5 TOPIC: ENRICHMENT

You have made it to your final week of Distance Learning, Congratulations!!

Here are some ideas to help keep your skills fresh over the summer, when you may not have access to the internet/computer/phone.

Remember to spend an equal amount of time outside as you do inside or in front of a “screen”! Have a great summer and I look forward to seeing you in the fall!

1. Take a walk and practice the technique of “Director’s Hands”
 - Directors Hands or Finger Frames help you learn your lenses' field of view. This is a gesture filmmakers use to frame up their shots without having to look through their camera's viewfinder. Your hands/fingers create the frame in which you look through.

2. Remember back to our lesson in Film Genres? Watch movies based upon their Genres: Action, Animation, Adventure, Comedy, Crime, Drama, Experimental, Fantasy, Historical, Musicals, etc.
3. Make a “video” flipbook. A small stack of image-filled sheets of paper that create an animation when you flip through them, you probably made one back in grade school. Later you can transfer this image to the computer and make a video. (you draw an image on a sheet of paper, and then duplicate that image, varying slightly on the following pages, to create the appearance of motion.
4. The Udemy company offers free tutorial for Premiere Pro:
