SUBJECT: Adv Math WEEK 5

PERIOD: _____

WEEK 5: SUMMARY AND REFLECTION

Hello Advanced Math students!!

Since this is the last week of assignments and all but 5 of you are seniors who are moving on to the next chapter of your lives, I would like to make this week a self-reflecting assignment. There will be no corrections and judgement on the answers that you write down, but I do want to know your thoughts. So, feel free to write away and be honest as I will be reading this all summer. I only ask that you keep the answers professional, no name-calling and profanity please. Feel free to use more than one binder paper. If you want to type, that's fine, too, as long as it's a file that I can open.

1. Of all the chapters in Larson PreCalculus, what was the hardest chapter/topic that you encountered? Explain in detail why it was hard for you?

2. Which topic was the most interesting?

3. Which topic did you think you needed the most to get help on, why and where did you get it? (BE HONEST!)

4. Which topic did you think will be the most useful for you in the real world? (Surely there are a few, depending on your planned area of work/expertise)

5. How did Advanced Math class help you as a student?

6. What could you have done better?

7. What could the teacher have done better?

8. How was your overall Adv Math experience this year (first to third quarter only)?

9. How was your 4th Quarter/Distance Learning experience in general?

Thank you once again for a great school year! Have a wonderful summer. Be safe and stay healthy!!
